

***THINK THE RICH DON'T PAY THEIR 'FAIR SHARE' OF TAXES? THINK AGAIN!***

Think the 'rich' don't pay their 'fair share' of taxes in America? Well, here are the facts on who REALLY pays the taxes that keep this country running:

**The top 1% of earners in America pay 38% of ALL income taxes collected by the government.**

**The top 5% of earners in America pay 58.7% of ALL income taxes collected by the government.**

**The top 25% of earners in America pay 86% of ALL income taxes collected by the government.**

**The top 50% of earners in American pay 97% of ALL income taxes collected by the government.**

**On the other hand, the bottom 47% of earners in America pay NO INCOME TAXES AT ALL!**

Is this fair that so many citizens pay nothing? NO, IT IS NOT! We agree that it is time for 'shared sacrifice' in this country - especially from those who pay NOTHING! Everybody in this country other than the extremely poor or disabled should pay SOMETHING - even \$100 a year. Everyone should contribute to our prosperity. It is against America's founding principles to allow almost 50% of the population to continue to vote for tax increases for the other 50%.

Do you agree?
